SUMMARY

An adaptable and detail-oriented Informatics Engineering graduate with professional experience across the telecommunications, banking, and public service sectors. Proven ability to work effectively in both technical and operational environments through internships and organizational leadership. Strong in problem-solving, communication, teamwork, and continuous learning, with experience supporting projects, managing administrative tasks, and collaborating with cross-functional teams. Passionate about leveraging technology, creativity, and analytical thinking to deliver meaningful contributions in dynamic and professional workplaces.

EDUCATION

Universitas Sumatera Utara

Diploma of Education, Informatics Engineering - GPA: 3.84

SMKS TIK DARUSSALAM MEDAN

Computer and Network Engineering - GPA: 89,24

Vocational School Graduate Academy (VSGA) – Kominfo

- Junior Mobile Programmer [Jun - Jul 2023]
- Junior Web Developer [Aug 2024]

EXPERIENCE

Fiber Technician (Certified Internship)

PT. Telkom Akses Indonesia [Feb - Apr 2022]

- Installed, maintained, and repaired fiber optic cables and GPON servers.
- Conducted regular maintenance and resolved connectivity issues to ensure network stability.
- Collaborated with teams to optimize infrastructure and troubleshoot system failures.

Back Office (Certified Internship)

PT. Bank Syariah Indonesia (BSI) [Mar 2025 - June 2025]

- Supported administrative and back-office processes to ensure smooth banking operations.
- Involved in data management, document verification, and archival processes according to company procedures.
- Earned certification recognizing competence in a professional banking environment.

Operational Division (Intern)

PT. Bank Sumut [Jun 2025 - Jul 2025]

- Assisted the operational team with daily transaction processing and supported customer service functions.
- Collaborated with staff to handle various operational tasks and resolve procedural inquiries.

Freelance Photographer

Event Photographer

- Captured and edited high-quality photos for events, including corporate gatherings, and public functions.
- Collaborated with event organizers to ensure optimal photographic coverage.

IT Support Technician

SMKS TIK Darussalam Medan [2022 – 2023]

- Maintained and managed school network infrastructure to ensure seamless connectivity.
- Diagnosed and resolved technical issues related to network and hardware.
- Provided IT support for students and staff, troubleshooting various system and connectivity problems.
- Conducted routine maintenance on network devices, servers, and computer systems.

IT Team Coordinator (Certified Internship)

BPJS Ketenagakerjaan Cabang Medan Kota [Aug 2025 – Dec 2025]

- Coordinated IT-related internship systems, including participant data management and system workflows.
- Managed and supported webinars, including technical setup and participant assistance.
- Assisted users in JMO (Jamsostek Mobile) activation, troubleshooting, and guidance.
- Conducted data blasting and reporting related to JMO activation progress.
- Developed a performance visualization website to monitor intern achievements and JMO activation metrics.

Event Organizer Staff (Ticketing & Logistics)

Event: “Rindu Tenang” [2025]

- Handled ticketing operations and attendee data management.
- Managed logistics, including inventory control of souvenirs, prizes, and event materials.
- Coordinated with the team to ensure smooth distribution and availability of event supplies.

ORGANIZATION

Himpunan Mahasiswa Teknik Informatika (HIMTI)

Head of Creative Media Division [Sept 2024 – Sept 2025]

- Led the Creative Media Division in managing visual and digital content for internal and external communications.
- Designed promotional materials, event posters, and social media content to enhance organizational branding.
- Coordinated with other divisions to support media needs for various campus events and initiatives.
- Supervised a team of designers and content creators to maintain consistency in visual identity and communication tone.

ACHIEVEMENT

- First Place & Highest Score (95.85) in Vocational Competency Test (UKK) for Computer & Network Engineering at SMKS TIK Darussalam Medan 2023.
- First Place in IT Networking Competition at SMKS TIK Darussalam Medan.
- Third Place in Coca-Cola Product Photography Contest at UPT TI2PB Universitas Dharmawangsa Medan.

PROJECT

Short Movie - 'Bot Attack'

- Utilized VFX and Blender to create realistic drone animations and effects.
- Oversaw the entire production process, from concept development to final editing, ensuring high-quality visual storytelling.

Social Media Design for @himti_fvusu & @pkkmb.vokasiusu

- Created and managed diverse digital content such as event recaps, posters, Instagram posts, commemorative designs, and informational visuals.
- Demonstrated strong design skills and consistency in building engaging social media aligned with organizational branding.

HandSpeak App

- Developed an Android mobile application for real-time Indonesian Sign Language (BISINDO) recognition using Flutter and TensorFlow Lite, achieving **94.71% validation accuracy** across 26 letter classes (A–Z).
- Built an end-to-end on-device ML pipeline integrating MediaPipe Hand Landmarker for 21-point hand landmark extraction and a custom-trained dense neural network (176-dimensional feature vector) for inference without internet connectivity.
- Implemented interactive learning features including a multi-mode quiz system, visual BISINDO dictionary, and gamified progress tracking with XP, streaks, and achievements.

Mahaasyik Resto - Full-Stack Web Application

- Developed a production-ready, full-stack restaurant management system using React.js (Vite) and Tailwind CSS for the frontend, alongside a robust Laravel 11 RESTful API backend.
- Engineered a scalable MySQL database architecture utilizing polymorphic relationships to seamlessly manage multiple transaction streams, including online delivery and table reservations.
- Integrated the Midtrans Payment Gateway (Snap API) and implemented server-to-server webhook callbacks for automated, real-time payment verification and order status updates.
- Deployed the decoupled architecture to cloud infrastructure, hosting the frontend on Vercel and the backend on Railway to ensure high availability and optimized performance.

SKILLS

- Web Development | UI/UX | React | Flutter | Python | Database | Laravel
- Network & UI Design | Fiber Optic Installation & Maintenance | GPON Server Management
- IT Support & Troubleshooting | Graphic Design & Photography | Event Photography
- Public Speaking | Social Adaptability | Passion for Continuous Learning
- Language Skills: Indonesian (Native), English (Intermediate)
